

### FINDINGS FROM DOCUMENTS

- References of advanced surgeries are found in Rig Veda — considered as first text of universe and which were created not later than 6000 BC
- Indians had developed 20 types of sharp instruments and 101 blunt instruments required for surgeries. Made from pure iron, many of them resembles modern surgical instruments
- Indians had performed 7 steps of treatment to heal wound
- Knew more than 4 ways to stop bleeding, crucial for a successful surgery
- Used ants for joining dissected intestines and leeches to suck impure blood — methods which are accepted in modern surgery in 19th century
- Performed cranial and plastic surgeries, crushed damaged ovaries, extracted dead fetus from womb and even removed the fetus from dead mother
